
Job Title

Application Developer

Description

A small technology consulting firm located in Chicago is seeking a Software Developer to join a team of successful developers working on a healthcare project. We are a Microsoft certified organization primarily utilizing .NET, C#, SQL Server 2005 and SharePoint on the Windows Server 2003 platform.

We are looking for a developer with a Computer Science Degree focusing on applications development. Minimum three to five years of hands on experience is required. Any healthcare background and some basic networking experience is also desired. This individual will be responsible for review, maintenance of existing code and new development.

This is a great opportunity to gain excellent experience.

Experience with the following:

- SharePoint Event and SharePoint Designer
- C# programming
- .NET (through 3.5)
- T-SQL
- SQL Server (through 2005)

- SQL Server Reporting Services
- Design patterns
- XML
- SQL server reporting services
- Visual Studio and Source Safe
- Software Development Life Cycle
- Web Development

Full benefits and salary.
