

SharePoint Developer

A Chicago based IT Professional Services firm located in Chicago is seeking a SharePoint Developer to join a team of successful developers working on healthcare projects. We are a Microsoft certified organization primarily utilizing .NET, C#, SQL Server 2008 R2 and SharePoint on the Windows Server 2008 R2 platform.

We are seeking a strong developer with .NET, Windows forms, ASP .NET forms and some SharePoint experience. Minimum three to five years of hands on development experience is required. This individual must have an understanding of Windows SharePoint Services, exploring a SharePoint site, understanding the relationship between windows SharePoint Services and SharePoint Server 2007 and considering complications of upgrading customized SharePoint Sites in SharePoint Designer.

Primary Job Responsibilities:

- Determines operational feasibility by evaluating analysis, problem definition, requirements, solution development, and proposed solutions.
- Documents and demonstrates solutions by developing documentation, data dictionaries, layouts, diagrams, charts, code comments and clear code.
- Prepares and installs solutions by determining and designing system specifications, standards, and programming.
- Improves operations by conducting systems analysis; recommending changes in policies and procedures.
- Obtains and licenses software by obtaining required information from vendors; recommending purchases; testing and approving products.
- Updates job knowledge by studying state-of-the-art development tools, programming techniques, and computing equipment; participating in educational opportunities; reading professional publications; maintaining personal networks; participating in professional organizations.
- Protects operations by keeping information confidential.
- Provides information by collecting, analyzing, and summarizing development and service issues.
- Accomplishes engineering and organization mission by completing related results as needed.
- Develops software solutions by studying information needs; conferring with users; studying systems flow, data usage, and work processes; investigating problem areas; following the software development lifecycle.

Qualifications:

- Professional knowledge of C# and SQL.
- Proficiency in Visual Studio, SQL Enterprise Manager, and SharePoint Designer
- Creating web pages from master pages
- Managing content placeholders and content regions
- Resetting master page site definition
- Creating customizable ASP.NET pages
- Editing JavaScript on ASPX pages
- Understanding CSS and Color-Coding options
- Creating, modifying, and deleting styles
- Examining core.css and default master
- Working with the page editor options dialog box
- Understand CSS inheritance
- Exporting and importing sites
- Creating and exporting data views
- Deploying web parts
- Using XML files as a data source
- Creating and modifying and publishing page layouts
